

Family 1

This Med Surg patient is a bed bound bilateral amputee who lives with his wife and their two grandsons in a home they rent in the 44103 area.

This family lives on a very limited income and continue to face challenges including needing to keep their grandsons (ages 8 and 9) home from school when it's cold as they are without warm coats to wear. Or struggling to afford a bottle of Tylenol for patient's pain control.

Family 2

This Hospice patient lives with her husband in the 44111 area. She recently went to respite and due to the short stay her family had planned to wash her clothing at home and return it to her. Unfortunately her clothing was accidentally sent to laundry without being labeled and was unable to be returned to her.

They are in need of clothing and food items.
